

(b) Actions normally requiring an EA, but not necessarily an EIS, are those projects in which at least some level of uncertainty exists regarding individual or cumulative effects on the quality of the human environment. Such actions generally include those identified in §§3407.6(b) and 3407.7 of this part.

(c) Actions normally requiring an EIS are projects which are determined to have a significant impact on the quality of the human environment or which will be performed under extraordinary circumstances. These types of actions are identified in §§3407.6(b) and 3407.8 of this part.

§ 3407.6 Categorical exclusions.

(a) All NIFA actions will be analyzed by the appropriate NIFA official specified in §3407.4(c) to determine whether the project under consideration will have a significant environmental effect prior to recommending to the official responsible for approving a formula project in the case of formula grants, or the official responsible for awarding a grant or cooperative agreement in the case of a grant or cooperative agreement that the action be undertaken. Unless otherwise determined to be necessary under the provisions of paragraph (b) of this section, however, the preparation of an EA or EIS is not required for the following categories of actions:

(1) *Department of Agriculture Categorical Exclusions (7 CFR 1b.3)*. (i) Policy development, planning and implementation which are related to routine activities such as personnel, organizational changes, or similar administrative functions;

(ii) Activities which deal solely with the functions of programs, such as program budget proposals, disbursement, and transfer or reprogramming of funds;

(iii) Inventories, research activities and studies, such as resource inventories and routine data collection when such actions are clearly limited in context and intensity;

(iv) Educational and informational programs and activities;

(v) Civil and criminal law enforcement and investigative activities;

(vi) Activities which are advisory and consultative to other agencies and public and private entities; and

(vii) Activities related to trade representation and market development activities abroad.

(2) *NIFA categorical exclusions* Based on previous experience, the following categories of NIFA actions are excluded because they have been found to have limited scope and intensity and to have no significant individual or cumulative impacts on the quality of the human environment:

(i) The following categories of research programs or projects of limited size and magnitude or with only short-term effects on the environment:

(A) Research conducted within any laboratory, greenhouse, or other contained facility where research practices and safeguards prevent environmental impacts;

(B) Surveys, inventories, and similar studies that have limited context and minimal intensity in terms of changes in the environment; and

(C) Testing outside of the laboratory, such as in small isolated field plots, which involves the routine use of familiar chemicals or biological materials.

(ii) Routine renovation, rehabilitation, or revitalization of physical facilities, including the acquisition and installation of equipment, where such activity is limited in scope and intensity.

(b) Exceptions to categorical exclusions. Notwithstanding paragraph (a) of this section, an EA or EIS shall be prepared for an activity which is normally within the purview of categorical exclusion where it is determined by NIFA that substantial controversy on environmental grounds exists or that other extraordinary conditions or circumstances are present which may cause such activity to have a significant environmental effect.

§ 3407.7 Actions normally requiring an environmental assessment.

The following actions normally will require an EA:

(a) Programs supported in whole or in part by NIFA which may result in a particular technology's moving from the field evaluation stage to large-

§ 3407.8

scale demonstration or simulated commercial phase.

(b) Field work that is expected to have an effect on the human environment such as large-scale excavations or the use of explosives.

(c) Projects for the construction or renovation of physical facilities, unless categorically excluded under § 3407.6(a)(2)(ii).

(d) Activities specified in § 3407.6(b).

§ 3407.8 Actions normally requiring an environmental impact statement.

An EIS normally will be required for major actions where it is determined by NIFA that such activity will significantly affect the quality of the human environment, including those specified in § 3407.6(b).

§ 3407.9 Use of environmental documents in decisionmaking.

In carrying out agency responsibilities under NEPA, NIFA officials shall:

(a) Consider all relevant environmental documents in evaluating programs, proposals, or projects for final agency action.

(b) Make all relevant final environmental documents, comments, and responses part of the record in rule-making and adjudicatory proceedings.

(c) Ensure that all relevant final environmental documents, comments, and responses are submitted to NIFA in a timely fashion, are subjected to normal agency review processes, and are made a part of the official record.

(d) Consider only those alternatives encompassed by the range of alternatives discussed in the relevant environmental documents when evaluating plans, programs, or proposals for agency action.

§ 3407.10 Preparation of environmental assessments.

(a) *Format and content.* An EA may be prepared in any format provided that it covers, in a logical and succinct fashion, the information necessary for determining whether a proposed NIFA action may have a significant environmental impact and thus warrant preparation of an EIS. The information must include brief discussions on the need for the project, alternatives to the proposed action, environmental impacts of

7 CFR Ch. XXXIV (1–15 Edition)

the proposed action and alternatives, and a listing of agencies and persons consulted (40 CFR 1508.9). Where possible, EAs should be limited to 10–15 pages. NOTE: It is the scope and complexity of the environmental issues, rather than the size of the project, that should be used to determine the length of the EA.

(b) *Supplements to environmental assessments.* Where substantial changes occur in a project or activity for which an EA has been prepared and it is determined by a responsible NIFA official specified in § 3407.4(b) that the changes are pertinent to environmental concerns, a supplement to the EA may be required. Supplements to EAs shall be evaluated and processed as stated in paragraph (c) of this section.

(c) *Decision notice.* Upon completion of an EA and any supplement thereto, the responsible NIFA official will evaluate the information it contains, determine whether an EIS is required or whether no significant environmental impact is likely to occur, and will document the decision and the reasons upon which it is based (40 CFR 1508.13). The EA shall be available to the public.

§ 3407.11 Preparation of environmental impact statements.

(a) *Actions involving more than one agency.* If more than one Federal agency participates in a program activity, a lead agency shall be selected in accordance with 40 CFR 1501.5(c). The lead agency, in full cooperation with all participating agencies, shall assume responsibility for involving the public as required in 40 CFR 1501.4(b) and shall prepare the EIS or shall cause the EIS to be prepared as provided in 40 CFR 1501.5.

(b) *Notice of intent.* If a responsible NIFA official designated in § 3407.4(b) of this part recommends the preparation of an EIS, the public shall be apprised of the decision. This notice shall be prepared according to 40 CFR 1508.2.

(c) *Draft and Final EIS.* The process of preparing the draft and final EIS, as well as the format of the document, shall comply with the provisions of 40 CFR parts 1502–1506.
